How to use this list

Four steps from walk-through to signed off.

1

Walk the job with the client

Go room by room with the client and your super. Write every item down while you're standing in front of it, with the area so the trade can find it.

2

Assign each item to a trade

Put the trade on every line and give it a due date. One item per line makes it easy to hand a copy to each sub.

3

Check it, then initial it

When a sub says an item is done, look at it before you check the box. Initial it so you know who signed off.

4

Get the final sign-off

When every line is checked, walk it again with the client and have them sign below. Keep the signed copy in the job file with your closeout paperwork.

FINAL SIGN-OFF

All items on this punch list are complete.

Client

Signature _____

Printed name _____

Date _____

Contractor

Signature _____

Printed name _____

Date _____

Running punch lists on several jobs? The Punch List and Closeout Kit tracks punch items by job, area and trade with due dates and homeowner sign-off, plus a 25-step closeout checklist and a warranty claims log. **organizedopskits.com/punch-list-closeout-kit**
